

LIGHTHOUSE: Agentic Workflow

The Household Storm File state machine. Agents do the cognition, the state machine constrains their authority, humans hold every gate that moves money.
Team Project Lighthouse | Track 04: Climate Risk & Disaster Coordination | FutureCaribbean Buildathon 2026

DATA SOURCES & APIs

HUMAN-IN-THE-LOOP

OUTPUTS

Every agent action is logged to the append-only ledger. Solid arrows: data and state flow. Dashed amber: human approval paths.
Compute right-sized: fine-tuned Jamaican Patois speech + intent model (H200) on the high-volume intake path; frontier reasoning reserved for verification and allocation planning. Intake runs on OpenClaw.
